

# AZAN JEAN-BAPTISTE

Software Engineer

+33 6 42 23 96 23 · jbazan.pro@gmail.com · Lille, France · jeanbaptisteazan.fr

## Summary

---

Versatile Software Engineer with a proven ability to adapt to diverse environments—from managing large-scale infrastructure at Scaleway to building agile solutions as a freelancer. I enjoy picking up new technologies quickly and delivering practical results, whether optimizing AI voice agents or architecting cloud-native systems. I am looking for a 6-month internship starting in January 2026 to apply this adaptability to complex engineering challenges.

## Technical Skills

---

- **Backend:** Go, Python, TypeScript.
- **Cloud & DevOps:** Kubernetes, Docker, Terraform, Ansible, ArgoCD, GitHub Actions.
- **Databases:** PostgreSQL, Redis, MongoDB.
- **AI & Voice:** RAG pipelines, Vercel AI SDK, STT/TTS optimization, Latency tuning.

## Work Experience

---

CareCall | *Software Engineer / DevOps*

Feb 2025 – Present

*Part-time during internship, transitioned to full-time (freelance) from September 2025*

- **Cloud Migration:** Orchestrated full migration to Azure Kubernetes Service (AKS), reducing MTTR from several hours to **< 10 minutes**.
- **AI Performance:** Optimized backend for AI voice agents, reducing overall latency and humanizing end-of-speech detection.
- **Security:** Implemented centralized PKI and internal VPN for GDPR-compliant infrastructure and security in the medical field.

Scaleway | *Software Engineer (Internship)*

April 2025 – Aug 2025

- **Apple Silicon Innovation:** Integrated Apple MDM for bare-metal infrastructure to manage macOS servers at scale.
- **Backup & Recovery Solution:** Prototyped high-performance backup solutions, enabling **full client config restoration in < 10 minutes**.
- **Automation:** Fully automated PKI certificate lifecycle using Vault to eliminate manual security interventions.

## Key Freelance Projects

---

- **Adfinitas:** Developed a dynamic donation form generator increasing conversion rates for several charities. (*See portfolio*)
- **Cabinet Donnadieu:** Built an LLM-based compliance analysis platform (Next.js, Vercel AI SDK) focused on data sovereignty and GDPR compliance.
- **Harp (SaaS):** Designed a scalable modular backend as Technical Lead for a 3D tutorial platform. [harp-frontend.vercel.app](#)
- **Oden:** Developed and commercialized a mobile app for university associations, acquiring 3 scholar groups in year one. [oden-app.com](#)

## Education

---

University of Kent | *Master of Science in Artificial Intelligence*

2025 – 2026

- Focus: Deep Learning, Cognitive Robotics, Security in AI, Advanced Python.

EPITECH | *Master's Degree in Information Technology*

2022 – 2027

- Regional Educational Assistant: Supervised and coached students in technical development and web projects.

## Languages

---

- **French:** Native speaker.
- **English:** Professional working proficiency.

## Interests

---

- **Sports:** Tennis (11 years of dedicated practice).
